6. Mobile APP Download

- (1) This product is used with the MettaGO App software. Please search for MettaGO in the app market or scan the QR code below to download and install the app.

- (2) After the device is powered on and enters the working state, find the WIFI that starts with "MettaX-*****" in the WIFI settings of your cell phone, and enter the default password "12345678" to connect.

- (3) Enter MettaGO APP after the connection is completed, the time of the recorder will be synchronized with the current time of the phone. (Be sure to format it the first time you use it on the product. Also to prevent too many emergency video files from taking up memory space on the device, it is recommended to format the memory card 1-3 times per month regularly).

7.Introduction to the basic functions of the APP

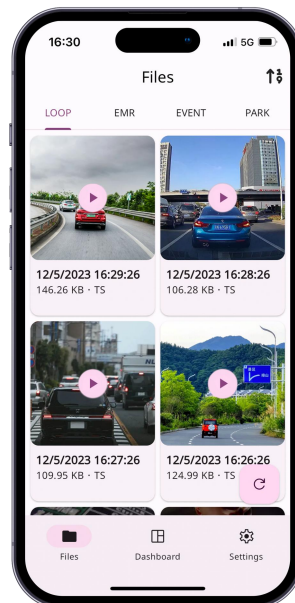

- (1) Set up Wi-Fi connection

(2) Operator annunciator

(3) Video playback

(4) Function setting

8. Installation method

- (1) First turn off the car engine, insert the TF card into the device, and then determine the installation location of the device, which is usually installed on the front and rear windshields of the car.

【Note】 Please use TF memory cards produced by regular manufacturers. You can choose memory cards with a capacity of 8GB-128GB and read/write speeds of no less than U1/Class10 level.

- (2) Clean the mounting location and make sure the surface is clean and dust-free.
- (3) Attach the static sticker to the windshield
- (4) Fix the bracket of the car recorder on the static sticker, and adjust the angle and direction.
- (5) Plug the car adapter into the car battery, the yellow wire connects to the VCC long power, the red wire connects to the ACC firing wire, and the black wire connects to the ground wire.
- (6) Connect the USB port of the recorder to the corresponding position of the car fuse box with a charging extension cable.

【Note】 Wiring can be done by laying the charging extension cord along the edge of the vehicle's windshield.

- (7) After the installation is complete, launch the software and make settings such as time, video quality, recording time, and so on.
- (8) Start the vehicle and check that the equipment is working properly.

【Note】 When the device is installed correctly, the system works to indicate the signal; The device starts to enter the working state and the display shows the video recording in progress.

9. Caveat

Before using this product, please read all precautions and online guides to ensure proper and safe use.
